

POTTING SOILS

Best nutrients
for a strong
plant growth

Using renewable
resources, saving
limited resources

Quality for a good price

Blumen- & Pflanzeerde

A multitalent with varied application possibilities

The **Naturahum potting & planting soil** is really an all-rounder and a universal potting soil for all plants of indoor, balcony and terrace. Furthermore it is a soil which is rich in structure and therefore suitable for planting shrubs, perennial plants and trees.

Best nutrients for a strong plant growth

The plants are optimally supplied with all necessary nutrients and reward this with vital growth.

Using renewable resources, saving limited resources

Peat still offers the best properties for a healthy and rich plant growth. But it is also a very precious and in Germany a limited resource, which should be used very rational.

This product is a peat reduced potting & planting soil and next to responsibly produced peat renewable raw materials like wood fibres are used.

Packaging sizes of:
10, 20, 45 and 70 litres

For further applications there are also:

- **Naturahum Graberde:** This is a dark soil with a decorative effect which is ideally for planting and ground covering grave sites. **20 & 45 litres**
- **Naturahum Gartentorf:** This is raised bog peat which stimulates the humus growth in the ground and loosens up the ground. **70 litres**
- **Naturahum Rindenmulch:** This is a natural coniferous wood bark for a decorative and convenient ground covering. **60 litres**

With the quality statement "Made in Germany" these soils are produced at the company-owned facilities in Northern Germany.

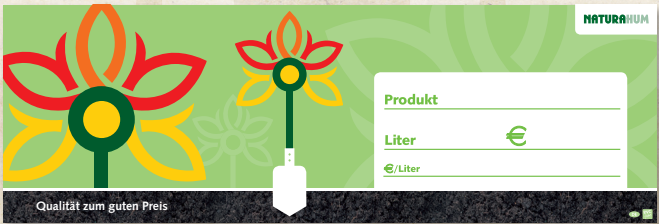

Naturahum is a very price attractive brand made by the company Gramoflor.

With this consciously reduced assortment all kinds of applications are basically covered. Naturahum offers a short overview and an easy choice to price-oriented customers.

The brand promise is:

“quality for a good price!”
